Index to Volume 110

No. 1

V. P. Guinn (Irvine, California, USA)
The usefulness of the advance prediction computer program in INAA studies 5

G. P. Westphal, Th. Kasa, W. Roch (Vienna, Austria)
Trends in instrumentation for activation analysis of short-lived nuclides 9

W. D. James, J. A. Oyedele (College Station, Texas, USA)
Application of reactor pulsing to neutron activation analysis 33

N. L. Truglio, V. P. Guinn (Irvine, California, USA)
Elements very rapidly measurable by INAA in biological and environmental materials 41

A. Egan (Kanata, Ontario, Canada)
Detection limits and precisions in various irradiation and counting regimes 47

D. D. Burgess (Hamilton, Ontario, Canada)
Optimization of neutron activation analysis by interactive computer graphics 51

G. Kennedy, J. Marcotte, L. Zikovsky (Montréal, Quebec, Canada)
An activation analysis system for short-lived radioisotopes including automatic dead-time corrections with a microcomputer 61

M. A. Al-Mugrabi, N. M. Spyrou (Guildford, UK)
The use of simulation for the optimisation of the signal-to-noise ratio in cyclic activation analysis 67

T. T. Vandergraaf (Pinawa, Manitoba, Canada)
Review of the role of nuclear analytical chemistry in the Canadian nuclear fuel waste management program 79

G. Bidoglio, G. Tanet, A. De Plano, G. P. Lazzari (Ispra, Italy)
Radionuclide chemical species determination in waste management studies 91

J. C. Laul, M. R. Smith, C. W. Thomas, P. O. Jackson, N. Hubbard (Richland, WA and Columbus, OH, USA)
Analysis of natural radionuclides from uranium and thorium series in briney groundwaters 101

R. Bojanowski, R. Fukai, E. Holm (Monaco)
Comparability of data for natural radionuclides in marine sediment obtained by different analytical techniques 113

B. B. Fong, A. Chatt (Halifax, N. S., Canada)
Characterization of deep sea sediments by INAA for radioactive waste management purposes 135

Elsevier Sequoia S. A., Lausanne
Akadémiai Kiadó, Budapest

INDEX TO VOLUME

R. H. Filby, S. Nguyen, S. Campbell, A. Bragg, C. A. Grimm (Pullman, WA, USA)
Evaluation of sample homogeneity for geochemical standard reference materials used in microanalysis 147

R. L. Korotev (St. Louis, Missouri, USA)
National Bureau of Standards coal flyash (SRM 1633a) as a multielement standard for instrumental neutron activation analysis 159

R. L. Korotev (St. Louis, Missouri, USA)
Chemical homogeneity of National Bureau of Standards coal flyash (SRM 1633a) 179

U. Herpers, R. Sarafin (Köln, FRG)
Determination of the spallogenic radionuclides ^{26}Al and ^{53}Mn in Antarctic meteorites with respect to cosmic ray exposure and terrestrial ages 191

R. A. Cahill, A. D. Autrey (Champaign, IL, USA)
Measurement of ^{210}Pb, ^{137}Cs, organic carbon and trace elements in sediments of the Illinois and Mississippi rivers 197

M. J. M. Duke, A. D. Smith (Edmonton, Alberta, Canada)
Rare earth element determination in silicate rocks using neutron activation analysis and mass spectrometry 207

W. A. Jester, M. Briceno, A. R. Jarrett, S. H. Sakuma, C. Yu (University Park, PA, USA and Kuala Lumpur, Malaysia)
Evaluation of lanthanum and praseodymium chelates of DTPA, CDTA, EDTA and NTA as groundwater tracers 215

F. F. Dyer, J. F. Emery, L. C. Bate (Oak Ridge, Tennessee, USA)
Determination of thorium and uranium at the nanogram per gram level in semiconductor potting plastics by neutron activation analysis 221

Wen-Ji Wang, Qing Sun, Bozhong Chen (Shanghai, People's Republic of China)
Further study on extraction equilibrium of uranium(VI) with dicyclohexano-18-crown-6 and its application to separating uranium and thorium 227

S. Yegnasubramanian, J. W. Mitchell (Bombay, India and Murray Hill, New Jersey, USA)
Silicon nitride homogeneity and compositional analysis by nuclear track counting and 14 MeV NAA 235

M. J. Apps, M. J. M. Duke, B. V. Turner (Edmonton, Alberta, Canada)
Fission track mapping of uranium in black spruce (Picea Mariana) twigs 245

N. N. Papadopoulos (Attiki, Greece)
Improvements of neutron activation techniques for the determination of fissile material concentrations 253

Junliang Tian, Chen-Lin Chou, W. D. Ehmann (Lexington, KY, USA, Wugong, Shaanxi Province, China and Champaign, IL, USA)
INAA determination of major and trace elements in loess, paleosol and precipitation layers in a pleistocene Loess Section, China 261

A. F. Oluwole, A. H. M. A. Hannan, L. O. Kehinde, A. B. Borishade, O. S. Adegoke (Ile-Ife and Akure, Nigeria)
Trace elements in Nigerian oil sands and extracted bitumens 275

R. G. V. Hancock, M. D. Grynpas, B. Alpert (Toronto, Ontario, Canada)
Are archaelogical bones similar to modern bones? An INAA assessment 283

J. Hallett, E. J. Keall, V. Vitali, R. G. V. Hancock (Toronto, Ontario, Canada)
Chemical analysis of Yemeni archaeological ceramics and the Egyptian enigma 293

No. 2

R. Dams, Y. Zhang (Gent, Belgium)
Elemental composition of dust in an iron foundry as determined by instrumental neutron activation analysis 305

T. G. Pringle, R. E. Jervis (Toronto, Canada)
Multi-element correlations for airborne particulate source attribution 321

S. Landsberger, A. Simsons, J. R. Kramer, J. J. Drake, S. Vermette, B. Shuter, P. Ihssen (Hamilton and Maple, Ontario, Canada)
Application of neutron activation analysis in acid precipitation studies 333

J. E. Milley, A. Chatt (Halifax, N. S., Canada)
Preconcentration and instrumental neutron activation analysis of acid rain for trace elements 345

M. de Bruin, P. Bode, H. Th. Wolterbeek (Delft, The Netherlands)
Studies of trace element transport in plants using high resolution γ-ray spectroscopy and perturbed directional correlation measurements 365

S. S. Krishnan, A. Cancilla, R. E. Jervis (Toronto, Ontario, Canada)
Industrial wastewater treatment for toxic heavy metals using natural materials as adsorbants 373

G. Capannesi, A. Cecchi, A. Cecchi-Fiordi (Roma and Firenze, Italy)
Mul'ielement determination in Tillandsia by INAA 379

J. W. Hilborn, B. M. Townes (Chalk River, Ontario, Canada)
Converting the SLOWPOKE reactor to low-enrichment uranium fuel 385

D. A. Becker (Gaithersburg, MD, USA)
The role of reactor characterization in NAA quality assurance 393

J. M. Dale, L. D. Hulett, S. Pendyala, W. S. Lyon (Oak Ridge, TN, USA)
Analytical applications of positrons 403

Z. R. Turel (Bombay, India)
Substoichiometry in neutron activation analysis technique 415

INDEX TO VOLUME

J. Hoste, C. Vandecasteele (Gent, Belgium)
Determination of light elements in metals and semiconductors by charged particle activation analysis 427

M. A. Misdaq, G. Blondiaux, N. Bordes, A. Giovagnoli, M. Valladon, L. C. Wei, M. Hage Ali, C. J. Maggiore, J. L. Debrun (Orléans, France)
Recent progress in the study of semiconductors using charged particle activation 441

E. A. Schweikert, P. E. Filpus-Luyckx (College Station. TX, USA)
Recent developments in chemical characterization with MeV ion beams 451

M. Peisach (Faure, South Africa)
XSQR: The technique of PIXE-induced XRF 461

G. Wauters, C. Vandecasteele, J. Hoste (Gent, Belgium)
The determination of lead in environmental and geological materials by proton activation analysis 477

R. M. Parr (Vienna, Austria)
Applications of nuclear analytical techniques in human nutrition research as exemplified by research programmes of the International Atomic Energy Agency 491

G. V. Iyengar (Jülich, FRG)
Radiochemical separations for inorganic trace elements in some biological reference materials, foods, tissues and body-fluids 503

L. S. McDowell, P. R. Giffen, A. Chatt (Halifax, N. S., Canada)
Determination of selenium in individual food items using the short-lived nuclide ^{77m}Se 519

J. Piedade-Guerreiro, M. Carmo Freitas, E. Martinho (Lisboa, Portugal, Gif-sur-Yvette, France and Sacavém, Portugal)
Application of NAA in determining the inorganic contents of the fruit fly (Ceratitis capitata Wied.) and its artificial food 531

K. Heydorn, E. Damsgaard (Roskilde, Denmark)
The determination of sampling constants by neutron activation analysis 539

A. Simsons, S. Landsberger (Hamilton, Ontario, Canada)
Analysis of marine biological certified reference material by various non-destructive neutron activation methods 555

P. Oltmann, D. E. Ryan (Halifax, N. S., Canada)
Heteropoly acids in the determination of phosphorus by neutron activation analysis 565

E. Sabbioni, R. Pietra, J. Edel (Ispra, Italy)
Levels, fate and biochemical mechanisms of trace metals in animals and man 573

C. K. Jayawickreme, A. Chatt (Halifax, N. S., Canada)
Determination of protein-bound trace elments in bovine kidneys, I. 583

E. Sabbioni, R. Pietra, F. Mousty, F. Colombo, G. Rizzato, G. Scansetti (Ispra, Cuasso al Monte, Milan and Turin, Italy)
Trace metals in human lung as determined by neutron activation analysis of bronchoalveolar lavage 595

J. R. W. Woittiez, B. J. T. Nieuwendijk (Petten, The Netherlands)
Analysis of selenium in environmental and biological samples by neutron activation 603

G. J. Evans, R. E. Jervis (Toronto, Canada)
Hair as a bio-indicator: limitations and complications in the interpretation of results 613

S. Sarmani (Selangor, Malaysia)
A study of trace element concentrations in human hair of some local population in Malaysia 627

N. I. Ward (Ascot, Berkshire, England)
The determination of boron in biological materials by neutron irradiation and prompt gamma-ray spectrometry 633

N. M. Spyrou (Guildford, Surrey, England)
Prompt and delayed radiation measurements in the elemental analysis of biological materials: the case for neutron induced gamma-ray emission tomography 641

K. G. McNeill, J. E. Harrison, S. S. Krishnan (Toronto, Ontario, Canada)
In vivo measurement of nitrogen by NAA 655

J. E. Harrison, K. G. McNeill, S. S. Krishnan (Toronto, Canada)
Neutron activation analysis for the routine clinical investigation of osteoporosis 663
